Via Madonnetta, 6 – Nanto (Vicenza) - Italy

Nanto, the 12th of October of 2009

PRESS RELEASE – SPA DESIGN 2009

Grassi 1880 Spa is an historic company that was created and fortified by the hard work of four generations of the family of Vittorio Grassi who was specialized in the extraction and processing of natural stones.

Dynamism and tradition are the result of over 130 years of experience and a untiring research aimed to experimentation, planning and improvement of new ideas, techniques and shapes in line with the classic and contemporary architectural trends.

The main priority of Grassi 1880 Spa is an extreme attention on research and improving the quality of Products and Service, that remains above all “made in Italy”, as well as a constant care to give value to customers’ projects.

The company is constantly engaged in researching and developing new markets for its materials Pietra di Vicenza, that since centuries has been used for architectural works of high relevance.

Between the Customers of Grassi 1880 we can find renowned purchasers. Architects and Designers known all over the world who build present and future history of design and architecture.

The exports of the company interests all the principal industrialized countries, like United States, Australia, New Zealand, Brazil, South of Korea, China, UAE, Russia, Middle East and obviously all Europe.

For Spa Design 2009 Grassi 1880 together with the Achitect Davide D’Agostino tried to combine the high aesthetic and technical qualities of the carved stones with the need to create visual and tactile emotions required from SPA: habitats that must restore and relax body and mind with fair elegance, hot smoothness and harmony of the contrast.

With this fair we would like to present a different way to interpret the space trough the stone, which is able to offer different vantages: freedom to draw new aesthetics horizons and the pleasure to build habitats designed on comfort, all supported by a company that offers a business organisation based on Customers desires.

Our materials Giallo Dorato, Bianco Avorio, Grigio Argento and Pietra di Vicenza, all from our own quarries, together with a new range of proposed stones, obtained thanks to strategic agreements with foreign and Italian quarries, combine high aesthetic value with a unique planning and technological capabilities.
