C'è una nuova tecnologia che non inquina: l'acqua

Un impegno costante
Ogni anno, in Italia, mezzo milione di tonnellate di sostanze organiche volatili, altamente tossiche, vengono emesse nell'atmosfera. MisuraEmme Spa proprietaria del marchio GAB, ha deciso di intraprendere un percorso di sviluppo che portasse l'azienda ad abbinare produttività e rispetto dell'ambiente, in nome di un forte impegno nell'etica d'impresa. Sono stati anni di ricerche difficili, di collaudi intensivi, di ostacoli superati, che hanno condotto MisuraEmme ad ottenere il successo tanto atteso. L'investimento di risorse, di tempo, di uomini ha consentito di studiare nuove soluzioni, di mettere a punto nuove vernici opache all'acqua, mai utilizzate prima nel settore del mobile.

Risultati che si vedono
Il risultato, oggi, è sotto gli occhi di tutti. MisuraEmme dispone di un rivoluzionario sistema di verniciatura. Interamente basato su prodotti idrosolubili, con prestazioni uguali e in certi casi superiori a quelle degli impianti tradizionali.

La vera ricompensa
Oggi, a parità di qualità, i laccati opachi e i vetri laccati opachi di MisuraEmme non danneggiano la natura e non pregiudicano la salute delle persone. Anche l'aria di casa diventa più salubre. Grazie alla tecnologia, l'acqua produce un'aria migliore. Quando la sfida si chiude con una vittoria come questa, l'orgoglio è la ricompensa più grande.

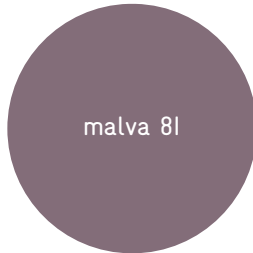

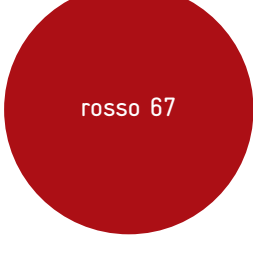

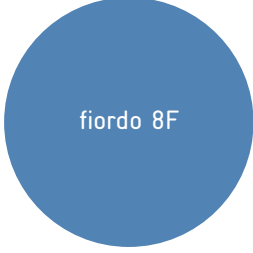

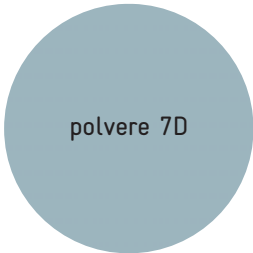

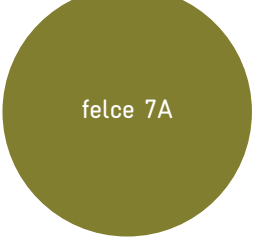

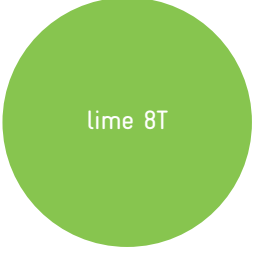

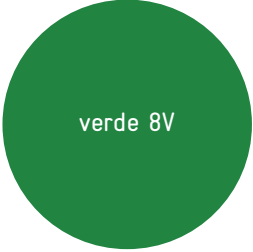

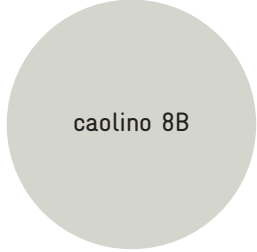

A constant effort
In Italy ever year half a million tons of organic volatile substances, highly toxic, are released into the air. MisuraEmme the owner of the brand GAB, decided to follow the path that would lead the company to combine productivity and respect for the environment. Years of difficult research and intensive testing, resulted in the long awaited success for MisuraEmme. The considerable effort both of time and employed resources has allowed the studying of new solutions, using new types of mat varnishes water-based which have never used before in the furniture business.

Visible results
The results, today, are visible to all. MisuraEmme has at its disposal the revolutionary systeme completely based on water-soluble products with equal results – and in certain cases even better results – in comparison to the traditional spraying plants.

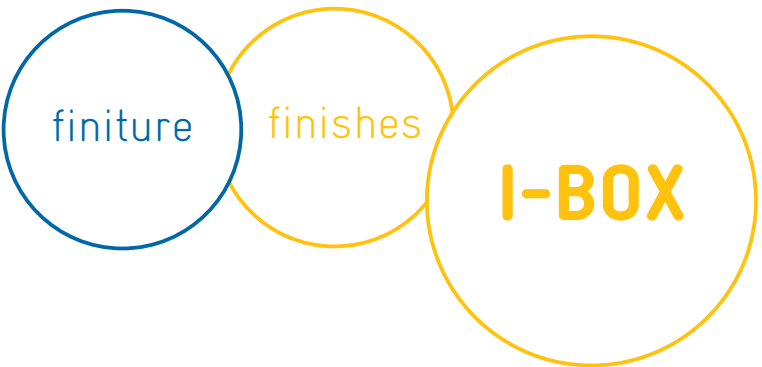

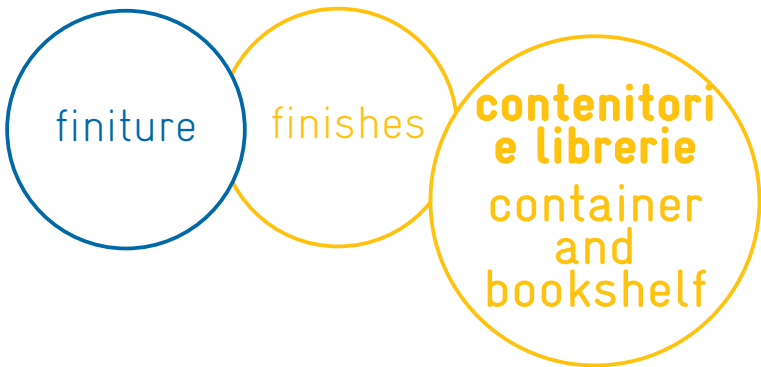

The true reward
Today, maintaining the same quality, the products mat lacquered and glass mat lacquered of MisuraEmme do not damage the environment, do not harm the health of personnel and does not pollute the air of the home environments. Thanks to technology, water produces healthier air. When the challenge closes with a victory like this, pride is the greatest reward.
