## **HI-MACS<sup>®</sup> Natural Acrylic Stone**

HI-MACS<sup>®</sup> is the New Generation of solid surface. It is composed of 70% natural stone powder derived from bauxite, 25% high quality acrylic resin and 5% natural pigments. Designed and produced by LG HAUSYS, a world technology leader, it is distributed across Europe from LG Hausys Europe headquarters in Geneva.

It is a product of highest quality, and is inert and ecological.

The most prestigious groups have adopted this product which adapts to the most demanding needs with its extraordinary characteristics; it is completely non-porous, has the highest level of durability and thus does not lose its colouring. It also has uniform thickness, allowing for perfectly imperceptible joints!

## **LED Technology**

The use LED technology has already added considerable improvements in the lighting market, features which will be present to an even greater extent in the future.

LEDs have a working life greatly superior to traditional light sources, allowing a substantial reduction in the use of energy, electricity and heat generation; as well as a better control of light, thus avoiding “light pollution.”

LED technology has improved turn-on times, in fact now immediate; as well as the total absence of lamp flickering sometimes present with fluorescent sources.

## **Swarovski Elements**

Swarovski Elements encapsulate all the beauty in the eye of the beholder, thanks to the purity, the precision cutting and perfect polishing of the crystals.

The MADE WITH SWAROVSKI ELEMENTS label serves as a certificate of authenticity. It marks products exclusively trimmed with genuine SWAROVSKI ELEMENTS.
