

ADRIANA LOHMANN - HOME SPA DESIGN- FUORISALONE 2012

Adriana Lohmann creates Luminous Sculptures and Chandeliers characterized by influences from the fashion world, Bio-Design and reuse of noble materials. Her atelier of Lighting Design sprouts collections that are at the same time glamorous, poetic and exclusive.

In the FuoriSalone events 2012 Adriana Lohmann presents:

- In the heart of Zona Tortona, in "Magna Pars" featuring "Home SPA Design 2012, inside the show ""A CASA DI DAVID" by N.O.W Lab. of the celebrated Architect Pietro Gaeta, Adriana Lohmann displays a "three dimensional forest" of her renowned "Colonne" collection, that composes a sort of hologram of decorative light. The "Colonne" are belonging to the collection "Perle" that, starting from this year, gives the name to chandeliers made with Styron polymer pearls that, blended with Crystals, give sweet reflections and luminescence effects.

In this ambiance of well-being together with aesthetic and spiritual "renaissance", is also displayed one Giant sized piece of the "Tourbillon" (reposition of Adriana's renowned model of the 90's, characterized by the unique spatially screwed shape) and then some "Cupido", truly geometric light columns interrupted by romboids, thus becoming one of the most acclaimed decorative pieces.

Then, at the "Media Point" of Magna Pars, Adriana will display four pieces of "Flocos", very eclectic and modern pieces characterized by unique PVC quadrilobes.

- In the show room Identity in viale Regima Margherita, together with an interesting show of the innovative panels of Alex Turco, Adriana Lohmann presents the limited series of "Hot", a truly peppery collection, made with thousands of red lucky-peppers, blended together with true jewelry pieces and mouth-blown crystal needles filled with red water! Also here is displayed another giant "Tourbillon" together with the luxury collection "Sherazade" made by hundreds-of true earrings, bracelets, and bijoux that are suspended to exquisitely diamond-finished chains. A good reason to say.....the sparkling light of jewelry!

Lastly then (but not least!) the "Flower Power", a collection of table and suspension chandeliers emanating iridescence effects, made with superimposition of layers of micro-perforated Terylene ribbons, up to obtaining true giant luminous flowers, another spectacular example of reuse of noble materials from the fashion world.

Adriana also creates unique and special-sized pieces, tailor-making luminous sculptures destined to selected international clients and commissioned from architects, stylists, hotel and interior designers.

Not only lights.....visual, tactile and sensorial emotions!
